Sladebank Woods – Pole structure and associated works

Proposed Lockable Store details

Please refer to the submitted photographs.

They were taken in the Park Gardens (opposite Coop store on Slad Road)

These are aimed at giving an idea of what we propose, but the eventual store will depend on availability, cost and the weight that can be readily transported up hill.

Approximate dimensions of proposed Lockable Store

Width: 18 inches / 46 centimetres

Length: 73 inches / 185 centimetres

Height: 24 inches / 61 centimetres

Constructed of steel plate

Installation

For security purposes, we will need to find some way of anchoring the box, which may need a small concrete pad into which to insert a hasp or hoop. The box will need to be slightly off the ground to reduce corrosion. A small amount of ground levelling will be required

Contents

We will only store low value products such as tarpaulins, water containers, ropes, signs hand tools in the container.
